

Wireless Network Setup Guide for Android Devices

What network do I connect to?

Delta_Guest: If you want to only logon for an 8 hour period and don't want the wireless network to remember your device, connect here and then launch a browser. You will be prompted to login to the Guest Portal.

Delta_Secure: If you just want your device to automatically connect every time you're on campus, follow the guide below. You will have to configure each device only one time. The Wireless Network will remember you until you have to change your Delta College Username and Password.

To configure your device to connect to Delta_Secure

***Note:** Each Android device is a little different, however this guide should provide the necessary information to connect an Android device to Delta College's wireless network.*

1. Within the **Applications** list of your device, choose **Settings**.
2. Choose **Wireless and Networks** section.
3. Ensure Wi-Fi is turned on.
4. Choose the **Wi-Fi Settings** option to configure a wireless network.
5. The **Wi-Fi Networks** section should show you a list of available wireless networks that your phone can interact with.
6. Choose **Delta_Secure**.
7. Configuration options for **Delta_Secure** will appear
8. Ignore the options for:
 - EAP Method
 - Phase2 Authentication
 - CA Certificate
 - User Certificate
9. Enter your Delta College username into the **Identity** field
10. There are more fields further below the identity screen.
11. Leave the **Anonymous Identity** field blank
12. Enter your Delta College password into the **Password** field.
 - This is the location where you will need to update your device when you change your Delta College account password.
13. Click **Connect**.
14. Because you've gone through these steps, your device will now be able to connect to the Delta College wireless network in the future without having to login again.

Please review the College's **Access and Use Guidelines** for personal device use located at:
